

ORLEANS COUNTY MONITOR.

VOL. 20---No. 24.

BARTON, VERMONT, MONDAY, JUNE 15, 1891.

GEO. H. BLAKE, PUBLISHER.

ORLEANS COUNTY MONITOR.
PUBLISHED WEEKLY BY
GEO. H. BLAKE,
BARTON, VT.

TERMS.—When Paid Strictly in Advance \$1.50 a Year. If not paid in advance \$2.00 a year. Subscribers living outside of Orleans or Caledonia Counties, \$2.25 per year.
Retail subscriptions in advance. Remit by Post Office Order, Registered Letter, or Draft.
Watch the label on your paper, and see that your mail is right and the money to make it so, or notify us of error by postal card.
Rates of Advertising made known on application. All cuts must have metal copy.

HOW TO MAKE APPLICATION FOR THE SUGAR BOUNTY.

There still seems to be a want of knowledge on the part of sugar-makers owners, as to how they are to make proper application for a license to make sugar under the bounty provisions of the sugar bounty law.

Having been in consultation with C. S. Forbes, St. Albans, Collector of Internal Revenue for Vermont, with reference to this matter, we think we speak by the book when we give the following directions:

Write Mr. Forbes at once for proper blanks for yourself, and your neighbors, giving their names, if they desire blanks.

Go before some Justice of the Peace, Notary Public, or other person authorized to administer oaths, who has a seal, and there make application and get your bonds signed.

Take along some neighbors or friends with you who will go on your bonds for \$200. Turn around then and sign their bonds with them, that the law may be complied with in regard to bonds.

Remember that the bonds are "null and void" if you honestly go forward in the manufacture of your sugar. Government will not let you put in any of your old sugar, or deal dishonestly, but it will not harm you in doing your work as Vermonters expect to deal—honestly.

Having signed your papers, be sure and have them in the office of Mr. Forbes, not later than June 30, 1891.

O. V. Joslyn and H. K. Dewey of this village; H. B. Cushman of Newport, and probably, others in the county, have seals. Mr. Joslyn advertises to supply himself with blanks and will properly make out and forward the papers.

Don't lose the opportunity. There seems to be considerable "red tape" in the matter, but it is only what government must have in order to protect itself against somebody who might be dishonest. We suppose it is not ten minutes' work to do all the business before an officer, if his two bondsmen with him.

CHEAP EXCURSION WEST.

It is only a few days ago since the trunk line and their connections fixed the rate to St. Paul and return at \$29.50 on the occasion of the holding of the annual convention of the Christian Endeavor societies, which takes place there in July next. Now the Boston & Maine and its connections comes to the front and offers a rate of only \$20.50 from Boston to St. Paul by any of their various routes. At the same time the sleeping car rate has been fixed at only \$4. This rate is short of all emoluments, commission, etc., which in the case of the other lines are paid out their \$29.50 rate, presumably to parties who may be interested in getting up the excursions. At the same time if a sufficient number of people signify their intention to go via any of the Boston & Maine routes, a special train of dining and sleeping cars will be run, leaving Boston July 6, affording excursionists a view of the White Mountains at sunset, and arriving at St. Paul on Wednesday a. m., in time for the opening of the Christian Endeavor convention on the afternoon of that day. Under the operation of the interstate commerce law this reduced rate cannot be given to the Christian Endeavor Society, but is open to the general public. With such unprecedentedly low rates the convention this year bids fair to be an unqualified success. Meanwhile New England Agent Miles and his assistants are lustily singing:

Where are you going, my pretty maid,
To the Endeavor Convention, sir, she said;
They tell me the rates are extremely low,
Only \$20.50, by the Maine, you go.

VALUE OF THE HOME MARKET.

Perhaps the value of the home market in the United States was never more apparent, by contrast, than it is to-day. Abroad we find financial affairs struggling under the break-down in the Argentine Republic, in which English capitalists are deeply involved and are heavy losers. Russia is making a desperate effort to sustain her enormous issue of paper currency by drawing gold from the continent, and the banks of London and Paris in turn have drawn \$50,000,000 in gold from this country since January. Revolution and counter-revolution are also playing havoc with other South American countries than Argentina. On the whole it is fortunate for the United States that we have had little to do with those countries for we should have fared no better than England has fared. Amid all this disturbance, of a very serious nature, in fact, the United States pursues the even tenor of its way. The vast domestic commerce of 64,000,000 people, continues to give general employment and reasonable prosperity to our people. The sole object of the much-abused McKinley bill was to preserve the American market for Americans by keeping both labor and capital employed at home. This is better than dabbling in "South Sea bubbles" and just escaping a disastrous financial panic.

Dispatches from Berlin to the London papers make no concealment of the fact that large numbers of the Jews exiled from Russia in a condition of pauperism are given free tickets direct from the German side of the frontier to the United States. The correspondents mention the fact of assisted passage as a matter of course. The tickets of the United States are given out with the soup, shoes and clothes, and the paupers are sent over here to be dumped on our shores, to throng the ranks of peddlers that are already

a sufficient nuisance, and sometimes a positive peril in our streets, and to help to bring down the wages of American workmen. The only point of interest here is the fact of the free tickets to New York. It is a fact which should receive the prompt attention of officials at the bureau office, for many of the holders of these free tickets must be on the way here. They should be, and doubtless will be, subjected to a most vigilant scrutiny.

More people, adults and children, are troubled with coarseness than with any other ailment. Dr. Henry Baxter's Mandrake Bitters will cure coarseness and prevent the diseases which result from it.

THE DISPUTE ABOUT BEHRING SEA.

The firm stand of the administration in defense of American rights in Behring Sea has had its effect with the British Government. After a great amount of political shuffling and useless procrastination, Lord Salisbury has had a bill introduced into the House of Commons empowering the British Government to put a stop to Canadian sealing in Behring Sea during the season of 1891. This bill has already been read twice in the House and will be pressed to a passage soon.

According to the proposition which Mr. Blaine made to the British Government in his letter of May 4, the United States is willing to bind itself to allow the killing of 7,500 seals only by the North American Company this year. This is done in order to enable the company to pay the running expenses of their establishment on the Pribyloff Islands and thus support the natives, who are dependent upon them for the necessities of life.

By the introduction of the bill in Parliament providing for the expulsion of the Canadian seal pirates Lord Salisbury has virtually admitted the contention of the United States Government, that the indiscriminate slaughter of the seals by the Canadians is contrary to common principles of equity which should prevail among nations. This is a fact which the Anglo-Mugwump organs will try to obscure. But they cannot succeed in doing it. Secretary Blaine, loyally supported by President Harrison, has maintained the American position in this dispute with great ability and fertility of resource. The nation knows it and will give him credit for it. Lord Salisbury's tardy concession will be generally taken to mean that Great Britain is now willing to fairly arbitrate the dispute about the seals.—Press.

"HOW TO CURE ALL SKIN DISEASES."—Simply apply "Swaine's Ointment." No internal medicine required. Cures tetter, eczema, itch, all eruptions on the face, hands, arms, etc., leaving the skin clear, white and healthy. Its great healing and curative powers are proved by its remedy. Ask your druggist for Swaine's Ointment.

CREAMERY INJUNCTION GRANTED.

The writ of the Vermont Farm Machine Company in protecting its patents in court has passed into a proverb. That this Company has lost none of its vigor in this regard has been made apparent within a few days to the Barden Automatic Cream Separator Co., of Middle Granville, New York.

The latter company were manufacturing a cabinet creamery, the valuable features of which were infringing upon the patents belonging to the Vermont Farm Machine Co. The company urged the Barden company, through correspondence, to desist apportioning the valuable features belonging to them, which were the most desirable features in the Barden apparatus.

The Barden Co. gave frivolous excuses, apparently for the purpose of delay, until it became necessary for the Vermont Farm Machine Co. to bring suit against the purchasers of the Barden Creameries.

Suits were brought for the infringement of two patents and a motion made for provisional injunction of the first claim of Wm. Cooley's patent which covers the process of water sealing.

The Barden Co. produced an array of old patents as alleged antedating the Cooley patent, but Judge Wheeler of the United States Circuit Court for the district of Vermont has held the Cooley claim valid and granted the injunction asked for against the continuance of the infringement.

Testimony for the infringement of the second, or Butler, patent is not completed and that case is still pending before Judge Wheeler.

EVERY TWO AND A HALF MINUTES.—The blood makes a circuit of the body every 2½ minutes, delivering nutrient and taking back waste matter to be filtered out by the liver and kidneys and removed from the body through the bowels and the urinary secretion. Any stoppage or hindrance in this process may produce various forms of disease, such as Dyspepsia, Biliousness, Constipation, Headache, Debility, and bad blood with its multiplied evils (sores, blotches, pimples, sores, eruptions, abscesses and the like). When such obstructions exist as evidenced by the presence of complaints similar to those just mentioned, the best medicine to use is Burdock Blood Bitters, which unlocks the secretions, removing all impure and effete matter through the proper channels. By restoring healthy action of the stomach, liver, kidneys and bowels, B. B. B. removes all impurities of the blood from a common impure to the most scrupulous state.

Another expedition has started for the Arctic regions to try to discover something about the little understood about Greenland. Lieut. R. E. Peary, U. S. navy is in command and will lead his expedition due north 3000 miles when it will separate and penetrate Greenland by two different routes. Whether the outcome of it will be a return with valuable information or the necessity of a search party later is a question which time will decide. The route mapped out touches the extreme northern limit of Greenland, and then stretches miles and miles northward over frozen ice caps and jagged, frozen sea. Although Greenland was inhabited by Europeans 1000 years ago very little is known about the northern limit, and nothing in relation to the extreme north-western boundary.

A WONDER WORKER.—Mr. Frank Hoffman, a young man of Burlington, Ohio, states that he had been under the care of two prominent physicians, and used their treatment until he was unable to get around. They pronounced his case to be Consumption and incurable. He was persuaded to try Dr. King's New Discovery for Consumption, Coughs and Colds and at that time was not able to walk across the street without resting. He found before he had used half of a dollar bottle, that he was much better; he continued to use it and in a few days enjoying good health. If you have any Throat, Lung or Chest Trouble try it. We guarantee satisfaction. Trial bottle free at H. C. Pierce's Drug Store.

WASHINGTON LETTER.

(SPECIAL CORRESPONDENCE OF THE MONITOR.)

Washington, D. C., June 1, 1891.

The president was so interested in preventing Secretary Blaine from unnecessarily worrying himself over the business of the state department that he sent Representative Hitt of Illinois, a close personal friend of both himself and Mr. Blaine, to New York to tell Mr. Blaine that there was nothing here which required his personal attention and to persuade him to take a long rest before again resuming his arduous duties, and he is much pleased at the success which Mr. Hitt met with, and also with the good news he brought of Mr. Blaine's condition. Mr. Hitt told the president that Mr. Blaine only needed a rest to be all right, and he has promised to take that.

Secretaries Tracy and Proctor and Postmaster General Wanamaker accompanied the president to Philadelphia Memorial Day. The party returned Saturday night.

Secretary Noble is expected to return to Washington this week. The rumor dispensers now have it that he is to succeed Robert Lincoln as minister to England and that Mr. Lincoln is to have the place he occupied in Presidents Garfield and Arthur's cabinets—Secretary of War, in place of Secretary Proctor, who is to succeed Senator Edmunds. All of which is interesting, and of course possible, but the most diligent inquiry among those who ought to know something about such important changes failed to authenticate the rumors, and it is known that when Secretary Noble left here a short time ago he had no idea of retiring from the cabinet before the 4th day of March, 1893.

There are a lot of mad democrats in the town. A scheme which has for some time been whispered among the faithful of that party has been exposed, and its friends fear, defeated by a sensational publication.

The article in question set forth the fact that the national association of democratic clubs, the executive committee of which was at the time in session in New York, is engaged in laying the wires for the nomination next year of Senator Gorman. It is well known here that such a movement, managed by some of the shrewdest men in the democratic party, has been quietly going on since early last winter, and that its managers did not wish it to get out because they were not fully prepared to antagonize the Hill and Cleveland people. The original programme, as outlined by a prominent democrat who was very much disgusted at the publication named, was to allow the Cleveland and Hill men to carry their fight to such an extent as to make the nomination of either impossible and then to spring the name of Gorman backed by the machinery of the democratic clubs, on the party as that of a man whose nomination would be acceptable to all wings of the party. Whether this exposure will result in making or killing the Gorman boom still remains to be seen; but it will in either case make the other candidates look with suspicion upon the association of democratic clubs.

No more elaborate and general observance of the ceremonies of Memorial day was ever held here than those of this year. After more than a week of rainy, disagreeable weather, the 30 was ushered in with glorious sunshine, and not a soldier's grave was left undecorated, and Arlington cemetery never looked more beautiful.

It seems to be the general opinion here that England will eventually agree to Secretary Blaine's proposition for a closed season in Behring Sea this year; but there are a few who believe that it is already too late to stop the killing of seals this season, and some think that Lord Salisbury, in going to parliament for authority to agree to the proposition, is only intending to take the matter to the Canadian vessels which are already illegally taking seals. All admit that it will be extremely difficult, even if both countries earnestly try, to prevent illegal sealing, after waiting until so late in the season.

It is semi-officially announced that Hon. Chas. E. Mitchell, commissioner of patents, has tendered his resignation, preferring to return to the practice of his profession. There is a general feeling of regret as his administration of the office has been an excellent one.

Notices calling in the 4½ per cent bonds which mature in September are being mailed to the holders of those bonds by the treasury department. These notices are sent out in compliance with law; but it has not yet been fully decided whether the holders of these bonds will be given the option of continuing them at a reduced rate of interest.

Attorney-General Millersaid to-day that he expected the appointments of the judges of the new land court to be made this week.

Adolf Lailoff, carriage manufacturer, 119 Carroll Street, Buffalo, N. Y., states: I was troubled with mucus, and the head and general debility. Burdock Blood Bitters cured me.

The Sons of the Revolution have called to public attention the fact that June 14 is the anniversary of the adoption of the American flag. June 14, 1777, the continental congress passed the resolution establishing the stars and stripes as a national standard. The beautiful old flag cannot be seen too often, and the suggestion that it be flung to the breeze all over the Union on its anniversary is an excellent one. As the 14th falls on Sunday, it is recommended that Monday, the 15th, be observed in its stead.

CATARH OF THE BLADDER.—I had been troubled since 1865 with Gravel and Catarrh of the Bladder. Tried several doctors, but got no relief. Finally, at the advice of E. D. W. Parsons, I was prevailed upon to try Dr. David Kennedy's Favorite Remedy. The result was marvelous. After using a few bottles, was entirely cured. S. N. Arnold, No. 522 Plymouth avenue, Rochester, N. Y.

The news from Hayti indicates that the partisans of Hyppolite have established a reign of terror. Not only the promoters of the late insurrection, but scores of others whom the authorities disliked or feared have been shot down relentlessly. Such outrages can only inspire a spirit of reprisal. They may result in an appearance of tranquility for a while, but their ultimate effect will be to bring about more bloodshed and revolution. Hayti sad-

ly needs public officials of some intelligence and patriotism. The adventurers who now rule are apparently as destitute of both as they are of common humanity.

Dean's Rheumatic Pill are a sure cure for all forms of chronic and inflammatory rheumatism and neuralgia. Entirely vegetable, always safe.

General Neal Dow, the doughty M. prohibitionist, lives in a house in Portland and with him built in 1828, and which has been his home ever since his marriage. He is eighty-seven years old, but as several of his ancestors turned the century mark, he expects to take a hand in the temperance battles of his state for many years to come.

My physician said I could not live, my liver out of order, frequently vomiting greenish mucus, skin yellow, small dry tumors on face, stomach would not retain food. Burdock Blood Bitters cured me. Mrs. Adelaide O'Brien, 72 Exchange St., Buffalo, N. Y.

Secretary Foster took the supervision of immigration recently and put it under national control. It was a wise step. The condition of things at Baltimore was almost a scandal. The only active member of the state board was an agent of a steamship line which brings over thousands of immigrants each month, and it has been noticeable that the number landing at that port has increased steadily for some time. Immigration is a national matter, and every detail of the work should be in the hands of the national government.

The exports of specie last week amounted to \$7,475,412, of which \$6,914,835 was in gold and \$560,577 in silver. All the silver and \$8,550,000 in gold went to London, \$1,000,000 in gold Paris and \$64,825 in gold was shipped to South American points. The imports of specie during the week amounted to only \$78,341.

ELECTRIC BITTERS.—This remedy is becoming so well known and so popular as to need no special mention. All who have used Electric Bitters sing the same song of praise.—A purer medicine does not exist and it is guaranteed to do all that Electric Bitters will cure all diseases of the Liver and Kidneys, will remove Pimples, Boils, Salt Rheum and other affections caused by impure blood.—Will drive Stalaria from the system and prevent as well as cure all Malaria from the system and prevent as well as cure all known fevers.—Prevent cure of Headache, Constipation and Indigestion try Electric Bitters.—Entire satisfaction guaranteed, or money refunded.—Price 50 cts. and \$1.00 per bottle at H. C. Pierce's Drug Store.

The Itata is ours at last, and the excitement is over. She arrived at Iquique, Chili, on last week Thursday, and was soon after landed over to the United States' warships in the harbor. The Charleston arrived at Iquique during the day, and the Itata will soon be taken back to San Diego. One report says that the rifles and supplies on board were landed before the surrender, but it is possible that such is not the case.

The steamship Itata arrived at Iquique, Chili, June 4, from Topocilla and has been delivered over to the American warships now here. The Charleston was expected to arrive the same day, from Africa.

The Itata was handed over to American war ships, to which she surrendered all the arms she took on board off San Diego. These consist of 5000 rifles.

The skill of the Itata's commander in reaching Iquique in safety, despite the great efforts put forth by the United States government to re-capture her on the high seas, is the subject of praise on every hand.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years Doctors pronounced it a local disease, and prescribed local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly upon the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address: F. J. CHENEY & CO., TOLEDO, O. Sold by Druggists, 75c.

State News Items.

Brattleboro has an evening school, which meets two evenings each week. Burlington has become a first-class post-office, and the salary of the postmaster will be \$3000.

John Dewey Fay, who died at East Chester recently, was the grandson of Colonel Joseph Fay, the first secretary of state of Vermont.

The University of Vermont purchased of Mary Fletcher hospital, for \$8,000 seventeen acres of land north of the Williston road and twenty-three acres south of it.

A National Holiness camp-meeting will be held at Northfield, Vt., June 20-29. A large number of prominent holiness people, including some of the noted preachers will be present. Suitable grounds, tent, boarding, will be had at reasonable rates. Railroad fares are low.

At the late State Baptist S. C. convention the following officers were chosen: Pres., Rev. Z. Martin, Bennington; Vice-pres., Rev. H. M. Douglas, Putney; Secretary, Rev. G. T. Raymond, Montpelier; Sec'y, Secretary, H. H. Hackley, Brattleboro; Treasurer, D. M. White, Rutland; Resolutions recommended the plan of benevolence described by Mr. McEwen, and urged the closing of the Columbian Fair on Sunday.

A special meeting of the State Farmers' League was held at Montpelier June 5, 200 farmers being present. Hon. E. P. Colton, President, presided. The following were appointed a Committee on Resolutions: Rev. George P. Beard, St. Albans; P. S. Clough, Waterbury; L. W. Mead, Proctor; A. D. Matthews, Barton Landing; H. H. Hill, Isle La Motte; S. D. Whiting, Johnson; A. J. Somers, Barre; O. L. Lorne, Jericho; J. D. Whitman, Brattleboro. An address of welcome was given by Hon. William Chapin of Middlebury. President Colton responding, Hon. Wm. M. Arms of Springfield spoke on "Why Should Farmers Organize?" He was followed by Hon. Ames Messer of Rochester on the same subject. Hon. Victor I. Spear of Brattleboro spoke of Vermont's abandoned farms. Col. George W. Hooker made a rattling speech on "New Era in Vermont." The meeting adjourned at noon till 2 p. m., when the farmers were addressed by Hon. Geo. T. Powell of Ghent, N. Y., President of the National Farmers' League. He adjourned at 5.30, after routine business.

Queen Victoria reigns over 367,000,000 souls—more than ever acknowledged any other sovereign—but with her people she doesn't seem to have much influence over her oldest son.

ROYAL BAKING POWDER
Absolutely Pure.
A cream of tartar baking powder. Highest of all in leavening strength.—Latest U. S. Government Food Report.
